

Ayrshire Breeders' Association

Gold Program

The Gold Program allows Dairy Herd Improvement production records to be transmitted from regional computing centers to the ABA office on a monthly schedule and added to the individual animal records of the association. Milk, butterfat and protein records of the 305-day standard production period, the 365-day extended period, and completed records of any length may be accommodated by the Gold Program.

Herd owners enrolled in the Gold Program are eligible for a variety of national awards and recognitions sponsored by the association.

Program fees are \$35 for annual herd fee plus \$5 per milking age females.

If you are interested in a complete package, the program fees for the Gold Program are included in the annual REWARDS Program, as are the fees for animal registry, transfers and classification. Please contact the ABA office for more information on the REWARDS Program.

GOLD Program Application

Name _____
